

SIEMENS

30-year-old enjoys being active and social again

Alison Myers can fully participate at work and play thanks to her Pure® hearing aids.

usa.siemens.com/hearstories

I've always been very confident and social. Over the last ten years, I've become "removed" due to my hearing loss. After a week of using my new Pure® hearing aids, I don't want to take

them out. I wore them golfing last week and my friend enjoyed that we no longer had to yell at each other the whole time.

My family has also noticed a difference. On a recent trip to Houston, my sister said talking to me seemed very natural. I no longer needed to focus on her and I wasn't getting mad at my brother each time he talked over her.

In addition to my involvement in community activities and events, I am training to run my first half marathon, during which I love to use my miniTek® to stream music to my Pure hearing aids. It is so much easier than trying to keep ear buds in my ears. In fact, I've even been recommending these to friends who don't have hearing loss.

My Pure hearing aids and miniTek have been life changers. I cannot express my gratitude in words, except to say – thank you!
