

SIEMENS

## Flight attendant keeps up with passengers despite noise

Linda Fabbro can hear clearly again thanks to her Pure<sup>®</sup> hearing aid.

My name is Linda Fabbro and I recently purchased a Siemens Pure<sup>®</sup> hearing aid from Palmetto Hearing in South Carolina. My profession as a flight attendant requires

me to have the ability to hear so many different sounds at many different levels all the time. With jet engines running, passengers asking questions, and other background noises on a flight, it can be hard to hear every sound when you have some type of hearing loss.

My new Siemens hearing aid not only lets me hear each sound, but separates the sounds with such clarity it's like having no hearing loss at all. It can be programmed for your type of hearing loss and is extremely comfortable, with just a small wire and speaker that easily fits into your ear canal. My hearing care professional, Cyndi Henderson, was so informative and answered all my questions. I left Palmetto Hearing with all the information I needed to use my new hearing aid and the ability to hear with such brilliance and clarity. I can't say enough about this hearing aid, and highly recommend it to anyone.
